

Our first related effort was made by creating our website, [athemis.gr](http://www.athemis.gr), in 2003, as recent graduates from Law School, by addressing mostly young colleagues.

Our motive was to fill the gap in online legal information

After a short period of time, our activities were expanded, in an effort to tackle the everyday problems of the legal profession, through various interventions to the institutional organs.

The need to enhance our effort, led to the creation of our association in 2008, taking into account the fact that a mere website was inadequate for our purposes.

e-Themis

as in Justice in the Electronic - Cyber World

The association e-Themis, established in 2008, from attorneys - members of the Bar Association of Athens and other cities as well.

Our primary focus is on the interaction between law and technology and especially in the cyberworld.

However, through our activities we seek to promote dialogue in every area spanning the law.

Every attorney, trainee or law graduate can become our member,

Today

we seek to play a major role in a collective effort to attain the following goals: to promote scientific dialogue, to shape a new perspective, focused on participatory and selfless action in favor of the legal science and consequently of society.

Our only ambition is to become a source of relevant initiatives, jointly with anyone who shares the same beliefs.
